Most swine producers have probably noticed that baby pig anemia is becoming more of a problem these days.

This is probably due to two factors. First, with today's continuous farrowing programs, more pigs are born during colder weather, are more closely confined, do not get out on pastures where they can get needed iron and copper from the soil. Second, our soils are becoming more lacking in these elements. That also means further increase in anemia.

Baby pigs should be watched for signs of anemia.

Today, as a result, this is one of the most widespread killers of baby pigs. Anemia is costing farmers such heavy losses that it has been selected as one of the prime targets for National Livestock Loss Prevention Year in 1959.

What can the swine producer do about the problem? First, he needs to recognize its symptoms early. If anemia progresses too far, the veterinarian may be unable to save the affected pigs. And, often those which do recover are unthrifty.

Treatment needs to be started promptly. Symptoms include listlessness, weakness, pale membranes in the mouth, lips, around and around the eyes and loss of appetite.

OF HOPE AND GLADNESS

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

BY MRS. ROBERT CANNON

CONGRATULATIONS are in order to the parents of two new sons. Coach Travis seemed mighty happy over the little boy left at his house on March 3rd. The young man weighed almost ten pounds and bears the proud name of Clinton Blane. He and his mother are both fine and are now at home from the Kendrick Memorial Hospital in Laverne.

Also heard via the grapevine that one of our favorite couples, the Jimmy Farris of Macon, Ga., have added a son to their family. We know how much happiness is in store for them and wish them all the best.

SOIL CONSERVATION NEWS

By T. C. Self and Joe Wildman, S.C.S.

Terracing is now in progress on the J. E. Sexton farm in the Kinston Community. Soil Conservation personnel are surveying lines on a 46 acre field that will be completed within a few days. Mr. Sexton realized some years ago that his soil was leaching away and had lost much top soil before he came into possession of the farm.

As the first measure, ditches were smoothed and planted to grass to be used as waterways. Now that some of the waterways are already planted the first year maintenance on these waterways will be greatly reduced.

A 25 acre field of terraces was completed last week on the Paul Martin farm also of Kinston. Smoothing is in progress on the F. F. Clark farm in the Brooklyn community.

District Cooperators will receive ballots through the mail within a few days. This ballot is to determine the creation of single county districts. Many other counties in Alabama are now single county districts and they find that it is to an advantage to have single county districts. We are looking forward to seeing Coffee as a district.

Soil Conservation personnel have completed the second field of parallel terraces and waterways on the F. F. Clark farm near Brooklyn.

By terracing one field per year, Mr. Clark finds that farming operations are not hindered or delayed and that the cost is spread over several years.

Terrace and waterway construction is now in progress on the L. J. Grimes farm in the Danley Cross Roads community.

As soon as smoothing is completed, terrace lines will be
